

Cloud Enabled Collaborative Content Creation and Media Management

Everything you need to store, share, manage, and move your media - on premise or in the cloud

Tiger STORE

High-Speed File System Sharing for Mac, Linux & Windows Clients

Tiger SPACES

Manage Users & Projects with Virtual Workspaces

Tiger POOL

Combine Multiple Storage Islands Into a Unified Volume

Tiger BRIDGE

Seamlessly Extend Local Storage to DAS, NAS, Tape and Cloud

"Envy have been using Tiger products for over 8 years and we have been impressed with the capability, reliability, and support."

- Jai Cave,
Technical Operations Director, ENVY

Cloud Enabled Performance, Flexibility, and Storage Optimization

Get everything you need for Creative Content Collaboration and Media Management with cloud-enabled Tiger Technology solutions for post, broadcast, and online media production. Share high-res media in real-time, streamline workflows with integrated project management, and gain back resources lost to storage management. Optimise your storage costs with NTFS access to cloud, disk, and tape storage, and stop wasting premium disk space with Intelligent replication to tape, disk, and cloud for backup, archive, multi-site collaboration, and other applications.

Multi-user media sharing

Workflow and project Management

Multi-site and remote collaboration

Intelligent Cloud Support

Works with all your storage, your network, your applications and your workflows.

Tiger STORE is the High-Speed File System Sharing module. Tiger Store provides the rock-solid and scalable foundation needed for the most demanding 4K and 8K workflows. It ensures the smoothest SAN/LAN cross-platform collaboration with failover capability, directory change notification, automatic defragmentation and image file sequence alignment for performance-oriented colour grading.

Tiger POOL is the Virtual Volume Set Management module. Tiger Pool aggregates multiple volumes in a non-destructive way to perform live storage expansion or decommission aging hardware without incurring downtime.

Tiger SPACES Spaces is the Virtual Workspace Management module. Tiger Spaces gives the ability to create, assign and manage virtual project workspaces. Facilities gain the freedom to move projects and assets across a mix of heterogeneous storage solutions, while preserving users' mount points and data paths intact. Tiger Spaces also supports Avid Bin Locking (optional).

Tiger BRIDGE is the HSM Tiering & Synchronization module. Tiger Bridge extends the file system seamlessly to store, archive and retrieve data to/from disk, cloud, or LTO tapes so content is always at the right place, at the right time. Its geo replication feature makes true remote collaboration a reality.

A Proven Solution for Managing, Sharing, Migrating and Archiving Projects in Cloud Integrated Workflows.

Optimize, Enhance, Improve

- Ensure smooth cross-platform collaboration (Win, Linux, Mac)
- Deliver rock-solid playback for 4K and 8K workflows
- Work with all popular content creation applications
- Provide control, visibility, and monitoring of user access
- Perform Automatic Defrag and Image File Sequence alignment
- Provide seamless failover for high-availability
- Aggregate multiple storage volumes in a single namespace
- Enable live capacity expansion of production volume
- Keep data accessible & transportable (NTFS/LTFS)
- Support native Active Directory / ACL
- Leverage cost effective storage tiers for nearline and archive

"Tiger Bridge maintains fast and transparent access to over 1.2 million files already migrated to the cloud, making them accessible for users with the library management software they were already using locally."

- Tibor Temesi, Silicon Computers, NAVA Technical Partner

About Tiger Technology

Customers in over 120 countries use Tiger Technology solutions to make their data management and project workflow easier. The company develops software only Windows cloud extension technology, high-speed NAS/SAN file system sharing, virtual volume set and virtual project workspace management, and HSM tiering and synchronization solutions. Tiger enables organizations of any size and scale to manage their digital assets on-premises, in public cloud, or with a hybrid model, and was identified by Endeavour as one of the foremost cloud technology providers on the market today.
